

Council Chairwoman
TONYA DAVIS JOHNSON

Presents:

Coding BOOTCAMP

TAUGHT BY
**CODE
FEVER**
Miami

During the bootcamp, students will gain hands-on experience with building at least two websites. In addition,

STUDENTS WILL:

- Learn about basic computer programming and design.
- Learn the basics of creating cool websites and apps that other people want to use.
- Develop the problem solving, analytical and creative thinking skills needed to design, develop, and implement a website or mobile application.
- Research and present technology-related topics to their peers.
- Interact with speakers from different parts of the tech industry.
